

## ABOUT GREEN ENERGY SOLUTIONS

Green Energy Solutions helps to expertly reclaim commercial spaces through outfitting and retrofitting buildings with environmentally responsible, energy-efficient products that are designed to dramatically reduce overall energy expenditures.

Green Energy Solutions is a leading industry expert on reducing the overall power costs of buildings from 1500 to 150,000 square feet. We are committed to provide the maximum number of energy solutions that yield a return on investment of three years or less.

With the huge selection of products and services available to help you save energy, it is imperative that you have a partner you can trust to rigorously research, test and determine the most suitable products for your specific needs and budget constraints. Don't lose money by installing sub-standard equipment or technology that has an unrealistic ROI.

Green Energy Solutions is your turn-key solution to saving money on your utility bills while at the same time saving the environment. We provide consultation, evaluation, installation, and even coordinate utility company rebates to ensure you receive the maximum value for your investment. Green Energy Solutions is your long-term partner for saving money while protecting the environment.

Complete energy saving solutions for companies large and small.

Save energy. Save money. Save the environment.  
**GREEN ENERGY SOLUTIONS.**

Reduce energy costs while improving the environment.

It's easier than you think.

Green Energy Solutions provides easy and cost-effective solutions to help you eliminate wasted or inefficient energy usage. Just a few minutes of your time could save you thousands of dollars.

Green Energy Solutions takes a well-rounded approach to saving energy and evaluates all options equally, placing the emphasis on a multi-dimensional approach to overall cost reduction rather than focusing on one or two specific items.

We start with a thorough energy audit **at no cost to you**, researching the nooks and crannies of your facility to ascertain opportunities for savings.

As industry leaders, we are able to offer you the most comprehensive energy savings plan available. We do not work for the energy companies, so we are able to provide solutions that make sense for you— and your bottom line. We research the best products and services to fit your needs so that you don't have to.

Going green can be a full-time job. It doesn't have to be yours. Let Green Energy Solutions be your partner in saving energy.

## OUR PRODUCTS

### LIGHTING

With the huge amount of lighting products available on the market today, it is imperative that you rely on an expert to make the right decision based upon your specific lighting needs. Many companies have actually lost money due to inferior product selection or poor installation. Your time is best spent running your business, not deciding between inductive, fluorescent, LED, metal halide, T-5 or T-8, lights. The wrong decision can actually lead to increased costs. Green Energy Solutions installs only the finest lighting products after thoroughly researching your lighting needs. And we always stand behind our installation.

### KVAR ENERGY CONTROLLER

The patented KVAR Energy Controller is an electromagnetic power factor optimization device that dramatically reduces the amount of energy wasted by the motors in your facility. This is an outstanding alternative to costly motor replacement, and will not only save you money but also significantly extend the life of your existing motors. We can save you up to 15% on the electrical costs of operating your motors.

Installation is easy and the savings are immediate. In fact, the KVAR unit will pay for itself in energy cost savings in as little as two years.

### TIMERS & SWITCHES

Why light a room when no one is using it? Power costs for non-occupied rooms can be reduced by 30% simply by installing the proper kind of occupancy sensor. We have solutions not only for small rooms but large rooms as well, ensuring that no one is left in the dark.

### SAVINGS WHERE YOU LEAST EXPECT

Before Green Energy Solutions begins any energy savings audit, we thoroughly scour your building, ascertain your energy needs, and search out any wasted power usage. We even pay attention to the smallest of details like hand dryers and programmable thermostats. You can be confident that we think of absolutely everything to save you money.

### FINANCING

We understand that cash flow is tight, and capital expenditures are scrutinized now more than ever, which is why we have partnered with leading financial institutions to offer you financing for the entire cost of your project. **In most cases, the electrical savings that we provide will actually pay for the lease payment, with little to no out-of-pocket expense for you.**

### A PARTNER FOR THE FUTURE

Green Energy Solutions is constantly seeking new products and methods to save you money and reduce your operating expenses, thereby increasing your bottom line. We promise to keep you up to date on any new opportunities to save you money on your energy bills.

## A TURNKEY SOLUTION

Green Energy Solutions will provide a **free** comprehensive energy audit for your facility and create a detailed report that outlines areas for efficiency improvement. We will provide you with monthly and annual savings for each option we provide, as well as a return on investment schedule for each option we provide you, and help you choose between the different options to help maximize your investment.

We will then manage your entire project from start to finish with the highest quality installation in the industry. Finally, we will coordinate your utility company rebates for you, meaning your time invested is insignificant compared to the savings you will achieve.

All you have to do is call Green Energy Solutions to start saving on your energy costs. It's that simple.

## THE REAL BENEFITS OF GOING GREEN

Going Green isn't just a sound bite anymore. The truth is, everything we do affects our environment. And no matter where you stand on the issues, saving energy and saving money together is just smart business. By partnering with Green Energy Solutions, you not only reduce your energy usage, you also reduce your impact on the environment. Reducing your carbon footprint and impact on our world doesn't just make sense for the environment, it makes sense for your bottom line, too.
